

LOST: YOUR TOOTH!

Even though you only have baby teeth for a few years, it's important to take good care of them. Healthy baby teeth help you chew food and speak properly. They also save room for your permanent teeth.

Help these kids keep their teeth healthy by drawing toothbrushes in their hands. Then, color the picture in!

Keep track of the teeth you've lost by coloring them in when you lose them. You can also write down when and where you lost your tooth, if you remember! Store the Tooth Tracker somewhere safe so you can color the next tooth you lose.

FUN FACT
Your teeth usually fall out in the order they came in!
