Healthy Smiles, Better Attendance: A Workshop for Educators

Did you know that oral health is one of the leading causes of school absences among children? Tooth pain and untreated dental issues can keep students out of class, disrupt learning, and impact long-term academic success. That's where HealthySmileLearning.org comes in! This free, bilingual resource from Delta Dental of Arizona and Arizona PBS that helps educators teach oral health in engaging, age-appropriate ways.

Join Our 1-Hour Hands-On Workshop and Make a Difference

In this interactive session, you'll:

-  Learn how oral health directly affects student attendance and performance
-  Experience hands-on activities you can use immediately in your classroom
-  Explore videos and lesson plans that make oral health education fun and accessible for grades preK-12

 **Why It Matters:** Students with healthy teeth are more likely to show up, stay focused, and thrive in school. By integrating oral health into your teaching, you're not just sharing knowledge, you're helping students stay in class and succeed.
